

Solar Automatic Watering System

SOL-C120

The weather responsive SMART irrigation controller

Suitable to irrigate one of the stated maximum planting quantities, or a combination thereof.

- 120x  20L
- 120x 
- 240x 
- 360x 
- 120m 

ECO	USES ONLY RAINWATER AND THE POWER OF THE SUN TO IRRIGATE YOUR PLANTS AUTOMATICALLY	
	USES UP TO 90% LESS WATER THAN A HOSE	

Solar Automatic Watering System

SOL-C120

Irrigatia weather responsive SMART irrigation controllers uniquely use solar power to detect the weather and alter watering according to the conditions and the season – providing plants with the precise irrigation they need to help them thrive.

They are easy to install and set up, and once in, they will water automatically with minimal supervision – ideal for small to medium gardens or allotments – and can be used for pots, raised beds, hanging baskets, vegetables and greenhouses.

Unlike conventional timer systems, by watering little and often, the soil stays moist and water does not run off, saving you water.

No mains, wires, or hosepipes needed nor heavy watering cans to lug water around the garden.

The SOL-C120 connects to the following Irrigatia Kits:

Drippers: Use for pots, baskets and individual plants.

Seephose: Ideal for short runs in a mixed dripper / seephose environment, germinating seedlings, watering plant troughs and small beds.

Microporous Hose: Ideal for flower beds, raised beds, vegetable plots, fruit trees and fruit cages.

- **The more sun, the more it waters – waters every 3 hrs**
- **Saves plants from drought and waters when on holiday**
- **Automatic watering for up to 50 large hanging baskets or 120 x 20 litre pots**
- **Drip waters up to 5m above the water source**
- **Uses up to 90% less water than a hose**
- **Easy, Eco, Efficient**
- **Water source to solar pump – maximum 20m**
- **Water source to last dripper – maximum 60m**
